

Project-Based CFD Industrial Training Program

From Fundamentals to Industrial Applications

Duration: 12+ Weeks (6 Modules) **Software:** ANSYS Fluent | ICEM CFD | MATLAB **Fee:** Rs. 7,500 (50% OFF)

Weekly Curriculum

Week 1 — Fundamentals of Fluid Flow & CFD

- Governing equations
- Laminar vs turbulent flows
- CFD workflow
- 2D & 3D laminar flow projects

Week 2 — Numerical Foundations (MATLAB)

- Discretization concepts
- Finite Difference Method
- 1D & 2D heat conduction
- 2D heat equation project

Week 3 — Internal Flow Simulations

- ANSYS Fluent interface
- Solver settings & convergence
- Pipe flow projects

Week 4 — CFD Meshing Fundamentals

- Structured/unstructured meshes
- ANSYS Meshing & ICEM CFD
- Mesh quality & Y+ studies

Week 5 — Turbulence Modeling & RANS

- k-e, k-w, k-w SST models
- Vortex shedding
- Bluff body analysis

Week 6 — Advanced CFD Applications

- Multiphase (VOF) flow
- Conjugate heat transfer
- Unsteady simulations & UDFs

What You Will Receive

- 15+ CFD Simulation Projects
- ANSYS Fluent Project Files
- Technical Reports
- Industry-Recognized Certificate
